PROJECTS

Student Management System,
Tech Stack: MySQL, Python
- Developed a database system to manage student details, attendance, marks, and course records.
- Designed relational database tables with proper normalization using MySQL.
- Implemented CRUD operations, SQL joins, and report generation for efficient data management.

Medical Image Fusion and Enhancement System,
Tech Stack: Python, Django, OpenCV, NumPy, SQL, HTML, CSS
- Developed a web-based medical image fusion system to combine MRI, CT, and PET images for improved diagnostic analysis.
- Implemented image processing algorithms such as ADMM-LatLRR and PCNN for image fusion and enhancement.
- Built secure user authentication, report generation, and image quality evaluation modules using Django.
- Evaluated fused image quality using metrics like SSIM, Entropy, Mutual Information, and Qab/f

INTERNSHIPS

Python Developer Intern(Online) – BIST Technologies
- Worked on Python programming concepts, file handling, and database connectivity.
- Developed mini applications using Python and MySQL.
- Gained hands-on experience in debugging, problem-solving, and backend fundamentals.

MySQL Intern (Online) – BIST Technologies
- Learned database design, normalization, and SQL query writing.
- Worked on CRUD operations, joins, subqueries, and report generation using MySQL.
- Developed mini database projects for data storage and management.
